

# Implementation

In order to make the „SOS homini” system function in a particular area it has to be administrated by the chosen organization which deals with both recruitment and verification of volunteers and dependent people as well as their training. Each organization which decides to implement the system in its localization is supervised and supported in terms of technicality by the Association „Homini” in Międzychód, which supervises the project across the country. To implement the system SOS homini, the Association „Homini” offers free of charge Know How and marketing references.
